

Samuel Ndung'u Kimiri

Fullstack Software Engineer · Founder

Building production fintech, marketplace, and AI-driven products for the East African market — from an M-Pesa-integrated rent platform to a multi-agent AI lending system.

PROFILE

Fullstack engineer in Nairobi building products aimed at real markets rather than demos: payments that clear, dashboards that hold up under real data, and interfaces that work on a mid-range Android phone over a patchy connection. Background in mining and mineral processing engineering (BSc, JKUAT) grounds a systems-first approach to constraints and failure modes; made a self-directed transition into JavaScript, TypeScript, React, and backend development, now applied to fintech and AI-driven software. Alongside engineering, founded and runs two creative-sector ventures — an online training institution and a brand design agency — and has taught technical and creative courses to students.

EXPERIENCE

Founder & Engineer — Imara Capital Nairobi · Present

- Building microloan and AI lending infrastructure for informal-sector traders across Kenya, including Imara Finance AI — a responsible microloan platform on a multi-agent AI lending framework with an interactive analytics dashboard.
- Authored a production-grade technical specification (Lovable/Supabase) covering five app pages and a multi-agent pipeline, plus an executive brief presented to a board of directors.

Founder — Sam Creative Graphics Nairobi

- Run a brand design agency — “Where Creativity Meets Strategy” — delivering brand identity, print, and digital design for clients, including the agency’s own public site, client quotations, and production-ready design assets.

Founder & Instructor — Sam Creative Design School Nairobi

- Built and grew SCDS into an online creative and technical training institution; taught creative and technical courses to students.
- Built the school’s LMS and a volunteer registration system (Supabase/Vercel), plus organizational structure documentation and a phased growth plan for the institution.

SELECTED PROJECTS

Renziy (formerly Rentza) — Rent, managed.

Kenya-first property management app giving landlords and tenants a shared, transparent way to handle rent, with M-Pesa payments on a Supabase backend.

React Supabase M-Pesa Vercel / Netlify

Imara Finance AI — AI lending, responsibly.

Responsible microloan platform for informal-sector traders, part of a multi-agent AI lending framework, with an interactive analytics dashboard.

Fintech Multi-agent AI React Supabase

PayTrack — Payments, tracked.

Unified payment-tracking application serving two businesses — SCDS and Sam Creative Graphics — from one interface, with financial records kept separate.

React Tailwind CSS Supabase

Webhook Verification Service — Trust the payload.

Service verifying inbound webhook signatures before trusting their payloads, keeping payment and integration callbacks (e.g. M-Pesa) tamper-proof.

Node.js Security Vercel

SKILLS

LANGUAGES

JavaScript TypeScript
C++

FRONTEND

React Tailwind CSS

BACKEND & INFRA

Supabase Node.js
Vercel Netlify

FOCUS AREAS

Fintech engineering
M-Pesa integration
AI / agentic systems

EDUCATION

BSc, Mining & Mineral Processing Engineering

Jomo Kenyatta University of Agriculture and Technology (JKUAT)
